# Introduction to Yoga

Yoga — from the Sanskrit root *yuj* meaning "to unite" — is one of humanity's oldest systems of physical, mental, and spiritual development. Dating back over 5,000 years to ancient India, yoga integrates breath (pranayama), physical postures (asana), meditation (dhyana), and ethical living into a comprehensive path toward wellbeing.

Modern science has validated what ancient yogis knew intuitively: regular yoga practice reduces cortisol by 23%, lowers blood pressure, improves flexibility by 35% in 8 weeks, strengthens muscles, enhances mental clarity, and significantly reduces symptoms of anxiety and depression. With over 300 million practitioners worldwide, yoga is the world's most widely practiced mind-body system.

## The 8 Limbs of Yoga (Patanjali's Ashtanga)

|               |                                                                                        |
|---------------|----------------------------------------------------------------------------------------|
| 1. Yama       | Ethical restraints — non-violence, truth, non-stealing, moderation, non-possessiveness |
| 2. Niyama     | Personal observances — purity, contentment, discipline, self-study, surrender          |
| 3. Asana      | Physical postures — the focus of this guide; preparing the body for meditation         |
| 4. Pranayama  | Breath control — regulating life force energy through the breath                       |
| 5. Pratyahara | Withdrawal of the senses — turning attention inward                                    |
| 6. Dharana    | Concentration — single-pointed focus on an object                                      |
| 7. Dhyana     | Meditation — unbroken flow of concentration                                            |
| 8. Samadhi    | Union — absorption in pure awareness; the goal of yoga                                 |

*"Yoga is the journey of the self, through the self, to the self." — Bhagavad Gita*

# How to Use This Guide

|                      |                                                                                                                           |
|----------------------|---------------------------------------------------------------------------------------------------------------------------|
| ■ <b>Duration</b>    | Hold each pose for the time specified. Beginners start at the lower range; advanced practitioners extend the upper range. |
| ■ <b>Breath</b>      | Never hold your breath. Each pose includes specific breathing cues — follow them for maximum benefit.                     |
| ■ <b>Safety</b>      | Check contraindications before each pose. When in doubt, consult your physician.                                          |
| ■ <b>Progression</b> | Master Beginner poses before attempting Intermediate. Advanced poses require months of preparation.                       |
| ■ <b>Repetition</b>  | Asymmetrical poses (left/right) should be held equally on both sides.                                                     |
| ■ <b>Alignment</b>   | Correct alignment over depth. A shallow pose with correct form beats a deep pose with poor form.                          |
| ■ <b>Practice</b>    | Even 20 minutes daily is more effective than 2-hour sessions twice a week.                                                |
| ■ <b>Warm-up</b>     | Always begin with Cat-Cow, Sun Salutations, or gentle warm-up before advanced poses.                                      |

| LEVEL        | EXPERIENCE       | PRACTICE TIME | COLOUR CODE |
|--------------|------------------|---------------|-------------|
| Beginner     | 0–6 months       | 20–30 min/day | ■ Green     |
| Intermediate | 6 months–2 years | 30–45 min/day | ■ Yellow    |
| Advanced     | 2+ years         | 45–90 min/day | ■ Red       |

# PART I — STANDING POSES

Stability · Strength · Grounding

| #1       | Tadasana · Mountain Pose                |          |                    | Beginner |
|----------|-----------------------------------------|----------|--------------------|----------|
| Category | Standing                                | Duration | 30–60 sec          |          |
| Breath   | Inhale to lengthen; exhale to root down | Caution  | Headache; insomnia |          |

## ◆ BENEFITS

Improves posture and body awareness; strengthens thighs, knees, and ankles; firms abdomen and buttocks; relieves sciatica; reduces flat feet

## ■ HOW TO PRACTICE

Stand feet together, weight even on all four corners of feet. Lift kneecaps, engage thighs. Lengthen spine, lift sternum. Shoulders back and down. Arms alongside body, palms forward. Crown of head rises. Breathe slowly.

| #2       | Vrikshasana · Tree Pose      |          |                                             | Beginner |
|----------|------------------------------|----------|---------------------------------------------|----------|
| Category | Standing                     | Duration | 30–60 sec each side                         |          |
| Breath   | Breathe normally, gaze fixed | Caution  | Vertigo; high blood pressure (no arms ov... |          |

## ◆ BENEFITS

Improves balance and stability; strengthens legs and core; opens hips; develops concentration and focus; calms the mind

## ■ HOW TO PRACTICE

Stand in Tadasana. Shift weight to right foot. Place left sole on inner right thigh (not knee). Bring palms together at heart. Raise arms overhead. Gaze at fixed point. Hold 30 sec, switch sides.

| #3       | Virabhadrasana I · Warrior I               |          |                                     | Beginner |
|----------|--------------------------------------------|----------|-------------------------------------|----------|
| Category | Standing                                   | Duration | 30–45 sec each side                 |          |
| Breath   | Inhale to lift arms; exhale to sink deeper | Caution  | High blood pressure; heart problems |          |

## ◆ BENEFITS

Builds strength and stamina; opens chest and lungs; strengthens shoulders, arms, and thighs; develops focus; energises entire body

## ■ HOW TO PRACTICE

From Tadasana, step right foot back 4 feet. Turn right foot out 45°. Bend left knee to 90° over ankle. Raise arms overhead, palms facing. Square hips forward. Hold 5 breaths, switch sides.

| #4       | Virabhadrasana II · Warrior II |          |                          | Beginner |
|----------|--------------------------------|----------|--------------------------|----------|
| Category | Standing                       | Duration | 30–45 sec each side      |          |
| Breath   | Long slow breaths throughout   | Caution  | Neck problems; diarrhoea |          |

## ◆ BENEFITS

Strengthens legs and hips; opens chest and shoulders; increases stamina; relieves backache; stimulates abdominal organs

## ■ HOW TO PRACTICE

Feet 4 feet apart. Right foot out 90°, left in 15°. Bend right knee over ankle. Extend arms parallel to floor. Gaze over right fingertips. Torso perpendicular to floor. Hold, switch sides.

| #5 Virabhadrasana III · Warrior III |                                  |          |                     | Intermediate |
|-------------------------------------|----------------------------------|----------|---------------------|--------------|
| Category                            | Standing                         | Duration | 20–30 sec each side |              |
| Breath                              | Steady even breathing throughout | Caution  | High blood pressure |              |

#### ◆ BENEFITS

Tones entire body; improves balance and posture; strengthens ankles and legs; tones abdomen; develops concentration and determination

#### ■ HOW TO PRACTICE

From Warrior I, shift weight forward onto front foot. Lean torso forward as back leg lifts. Create one straight line from hands through spine to raised heel. Arms forward or alongside body. Hold 5 breaths.

| #6 Trikonasana · Triangle Pose |                                      |          |                              | Beginner |
|--------------------------------|--------------------------------------|----------|------------------------------|----------|
| Category                       | Standing                             | Duration | 30–60 sec each side          |          |
| Breath                         | Inhale to lengthen; exhale to deepen | Caution  | Low blood pressure; migraine |          |

#### ◆ BENEFITS

Stretches legs, hips, spine, chest, shoulders; relieves stress and anxiety; strengthens thighs; improves digestion; therapeutic for flat feet

#### ■ HOW TO PRACTICE

Feet 4 feet apart. Right foot out 90°. Extend arms to T. Reach right hand to shin or floor outside right foot. Extend left arm straight up. Look up at left thumb. Hold, switch sides.

| #7 Utkatasana · Chair Pose |                                            |          |                              | Beginner |
|----------------------------|--------------------------------------------|----------|------------------------------|----------|
| Category                   | Standing                                   | Duration | 30–60 sec                    |          |
| Breath                     | Exhale to deepen; inhale to lengthen spine | Caution  | Low blood pressure; insomnia |          |

#### ◆ BENEFITS

Strengthens thighs, ankles, calves, spine; stimulates heart and diaphragm; reduces flat feet; tones abdominal organs; builds heat

#### ■ HOW TO PRACTICE

Stand in Tadasana. Inhale, raise arms overhead. Exhale, bend knees as if sitting in a chair — thighs as parallel to floor as possible. Keep torso upright. Weight in heels. Hold 5–10 breaths.

| #8 Garudasana · Eagle Pose |                         |          |                  | Intermediate |
|----------------------------|-------------------------|----------|------------------|--------------|
| Category                   | Standing                | Duration | 30 sec each side |              |
| Breath                     | Breathe into upper back | Caution  | Knee injury      |              |

#### ◆ BENEFITS

Strengthens calves, ankles, thighs; stretches shoulders and upper back; improves concentration and balance; opens hips

#### ■ HOW TO PRACTICE

Bend knees. Cross right thigh over left. Right foot wraps behind left calf. Cross left arm over right at elbows; wrap forearms; lift to eye level. Sink hips lower. Hold, switch sides.

| #9       | Parsvottanasana · Pyramid Pose            |          | Beginner                         |
|----------|-------------------------------------------|----------|----------------------------------|
| Category | Standing                                  | Duration | 30–60 sec each side              |
| Breath   | Inhale to lengthen; exhale to fold deeper | Caution  | Back injury (slightly bent knee) |

#### ◆ BENEFITS

Intensely stretches hamstrings and spine; improves posture and balance; calms the brain; stimulates liver and spleen; improves digestion

#### ■ HOW TO PRACTICE

Step right foot forward 3 feet. Square hips forward. Hinge from hips over right leg, reaching hands toward floor. Keep both legs straight. Hold 30–60 sec, switch.

| #10      | Parsvakonasana · Extended Side Angle |          | Beginner                      |
|----------|--------------------------------------|----------|-------------------------------|
| Category | Standing                             | Duration | 30–45 sec each side           |
| Breath   | Breathe into the side body           | Caution  | High blood pressure; insomnia |

#### ◆ BENEFITS

Strengthens legs; stretches groins, spine, chest, lungs, shoulders; stimulates abdominal organs; increases stamina

#### ■ HOW TO PRACTICE

From Warrior II, bring right forearm to right thigh. Extend left arm overhead in line with body. Turn gaze up. Create diagonal line from left foot to left hand. Hold, switch sides.

| #11      | Uttanasana · Standing Forward Fold |          | Beginner                           |
|----------|------------------------------------|----------|------------------------------------|
| Category | Standing                           | Duration | 30–60 sec                          |
| Breath   | Exhale to release deeper into fold | Caution  | Back injury (bent knees); glaucoma |

#### ◆ BENEFITS

Calms brain and nervous system; relieves stress; stretches hamstrings, calves, hips; stimulates liver and kidneys; improves digestion

#### ■ HOW TO PRACTICE

Stand in Tadasana. Exhale, hinge from hips forward. Bring chest toward thighs. Let head hang freely. Fingertips to floor or grab elbows. Weight slightly forward on feet. Hold 5–10 breaths.

| #12      | Ardha Uttanasana · Half Forward Fold / Flat Back |          | Beginner         |
|----------|--------------------------------------------------|----------|------------------|
| Category | Standing                                         | Duration | 15–30 sec        |
| Breath   | Inhale to lengthen and hold                      | Caution  | None significant |

#### ◆ BENEFITS

Lengthens spine; strengthens back; prepares for forward folds; improves posture; stretches hamstrings with spinal integrity

#### ■ HOW TO PRACTICE

From Uttanasana, press fingertips to floor or shins. Inhale, lengthen torso parallel to floor (flat back). Gaze forward. Micro-bend knees if hamstrings are tight. Hold 5 breaths.

| #13      | Natarajasana · Dancer's Pose      |          | Advanced                         |
|----------|-----------------------------------|----------|----------------------------------|
| Category | Standing                          | Duration | 20–30 sec each side              |
| Breath   | Steady breath to maintain balance | Caution  | Low blood pressure; ankle injury |

#### ◆ BENEFITS

Develops balance and concentration; stretches shoulders, chest, thighs; strengthens legs; improves posture; energises

#### ■ HOW TO PRACTICE

From Tadasana, shift weight to right foot. Bend left knee, hold left ankle with left hand behind you. Raise right arm forward. Kick left leg back and up while leaning torso forward. Create bow shape. Hold, switch.

| #14 Vrschikasana · Scorpion Pose |                           |          |                                        | Advanced |
|----------------------------------|---------------------------|----------|----------------------------------------|----------|
| Category                         | Standing                  | Duration | 10–20 sec                              |          |
| Breath                           | Slow controlled breathing | Caution  | Any injury to wrists, shoulders, spine |          |

#### ◆ BENEFITS

Ultimate back flexibility; builds shoulder and arm strength; improves balance and focus; stimulates nervous system; advanced backbend

#### ■ HOW TO PRACTICE

Begin in forearm stand against wall. Arch back and bend knees, lowering feet toward head. For full pose: head lifts, feet touch head. Requires years of preparation. Hold 10–20 sec.

| #15 Hasta Uttanasana · Raised Arms Pose |                                        |          |                                 | Beginner |
|-----------------------------------------|----------------------------------------|----------|---------------------------------|----------|
| Category                                | Standing                               | Duration | 30 sec                          |          |
| Breath                                  | Inhale to lift and open; exhale gently | Caution  | Neck injury (keep neck neutral) |          |

#### ◆ BENEFITS

Stretches chest and abdomen; improves digestion; expands lung capacity; relieves mild depression; warms up the spine for backbends

#### ■ HOW TO PRACTICE

Stand in Tadasana. Inhale, raise arms overhead. Interlace fingers except index fingers. Exhale, gently arch back keeping neck long. Gaze up at thumbs. Hold 5 breaths.

| #16 Malasana · Garland / Yogi Squat |                                             |          |                                     | Beginner |
|-------------------------------------|---------------------------------------------|----------|-------------------------------------|----------|
| Category                            | Standing                                    | Duration | 1–3 min                             |          |
| Breath                              | Normal breathing, let gravity help you sink | Caution  | Knee injury; tight hips (use block) |          |

#### ◆ BENEFITS

Opens hips, groins, ankles; tones abdominal organs; improves digestion; relieves lower back tension; strengthens feet and ankles

#### ■ HOW TO PRACTICE

Stand with feet slightly wider than hips, toes turned out. Squat down between thighs. Bring palms together at heart, elbows pressing knees wide. Sit tall. Hold 1–3 minutes.

| #17 Prasarita Padottanasana · Wide-Leg Forward Fold |                       |          |                                     | Beginner |
|-----------------------------------------------------|-----------------------|----------|-------------------------------------|----------|
| Category                                            | Standing              | Duration | 30–60 sec                           |          |
| Breath                                              | Exhale to fold deeper | Caution  | Low blood pressure (come up slowly) |          |

#### ◆ BENEFITS

Stretches inner and back legs; tones abdominals; calms brain; relieves mild backache; strengthens feet and ankles

#### ■ HOW TO PRACTICE

Step feet wide (4–5 feet). Turn toes slightly in. Hinge forward from hips, hands to floor. Walk hands toward centre, crown of head toward floor. Straighten legs. Hold 5–10 breaths.

| #18 Ashta Chandrasana · High Lunge / Crescent Pose |                                    |          |                     | Beginner |
|----------------------------------------------------|------------------------------------|----------|---------------------|----------|
| Category                                           | Standing                           | Duration | 30–45 sec each side |          |
| Breath                                             | Inhale to lengthen; exhale to sink | Caution  | Knee injury         |          |

#### ◆ BENEFITS

Strengthens legs, glutes, core; stretches hip flexors; opens chest; improves balance; builds endurance and focus

#### ■ HOW TO PRACTICE

From forward fold, step right foot back into lunge. Back heel lifted. Bend front knee to 90°. Raise arms overhead, palms facing. Square hips forward. Engage core. Hold, switch sides.

| #19 Parivrtta Trikonasana · Revolved Triangle |                                            |          | Intermediate                 |
|-----------------------------------------------|--------------------------------------------|----------|------------------------------|
| Category                                      | Standing                                   | Duration | 30 sec each side             |
| Breath                                        | Inhale to lengthen; exhale to twist deeper | Caution  | Low blood pressure; migraine |

#### ◆ BENEFITS

Improves spinal rotation; strengthens legs; opens chest; detoxifies organs through twisting; improves digestion and circulation

#### ■ HOW TO PRACTICE

Feet 3 feet apart. Right foot forward, left foot in 45°. Square hips forward. Left hand to right ankle or floor outside right foot. Right arm straight up. Open chest to right. Hold, switch.

| #20 Viparita Virabhadrasana · Reverse Warrior |                                |          | Beginner         |
|-----------------------------------------------|--------------------------------|----------|------------------|
| Category                                      | Standing                       | Duration | 30 sec each side |
| Breath                                        | Inhale to open; exhale to sink | Caution  | Shoulder injury  |

#### ◆ BENEFITS

Stretches side body intensely; strengthens legs; opens chest and shoulders; relieves side body tightness; improves stamina

#### ■ HOW TO PRACTICE

From Warrior II, flip front palm up. Slide back hand down back leg. Reach front arm up and overhead toward back of room. Arch into side stretch. Hold, switch sides.

## PART II — SEATED POSES

Flexibility · Calm · Introspection

| #21 Sukhasana · Easy Pose | Beginner                              |          |                              |
|---------------------------|---------------------------------------|----------|------------------------------|
| Category                  | Seated                                | Duration | 5–30 min                     |
| Breath                    | Long deep breaths; observe the breath | Caution  | Knee injury; hip replacement |

### ◆ BENEFITS

Opens hips and groin; lengthens spine; calms the mind; reduces anxiety; foundation for pranayama and meditation; reduces physical and mental exhaustion

### ■ HOW TO PRACTICE

Sit on floor or folded blanket. Cross legs comfortably (shins crossed). Place hands on knees in gyan mudra (thumb-index). Lengthen spine. Relax shoulders. Close eyes. Breathe slowly.

| #22 Padmasana · Lotus Pose | Advanced                    |          |                                       |
|----------------------------|-----------------------------|----------|---------------------------------------|
| Category                   | Seated                      | Duration | 5–30 min                              |
| Breath                     | Natural, slow, deep breaths | Caution  | Knee injury; ankle injury; tight hips |

### ◆ BENEFITS

Deep hip opener; calms the brain; stimulates pelvis and spine; keeps joints mobile; sacred meditation posture; activates prana flow through body

### ■ HOW TO PRACTICE

Begin in Sukhasana. Lift right foot onto left thigh (half lotus). Lift left foot onto right thigh. Soles face upward. Spine erect. Hands in chin or gyan mudra. Hold 5+ minutes.

| #23 Paschimottanasana · Seated Forward Bend | Beginner                           |          |                                |
|---------------------------------------------|------------------------------------|----------|--------------------------------|
| Category                                    | Seated                             | Duration | 30–60 sec                      |
| Breath                                      | Inhale to lengthen; exhale to fold | Caution  | Asthma; diarrhoea; back injury |

### ◆ BENEFITS

Stretches spine, shoulders, hamstrings; calms brain; stimulates liver and kidneys; improves digestion; reduces obesity; therapeutic for high blood pressure

### ■ HOW TO PRACTICE

Sit with legs extended. Inhale, raise arms, lengthen spine. Exhale, hinge from hips forward — chest leads, not forehead. Reach for feet (or use strap). Hold 5–10 breaths.

| #24 Baddha Konasana · Butterfly / Bound Angle | Beginner                  |          |                      |
|-----------------------------------------------|---------------------------|----------|----------------------|
| Category                                      | Seated                    | Duration | 3–5 min              |
| Breath                                        | Breathe into inner thighs | Caution  | Groin or knee injury |

### ◆ BENEFITS

Opens inner thighs and groin; stimulates reproductive organs; relieves menstrual cramps; helps with childbirth preparation; stimulates heart

### ■ HOW TO PRACTICE

Sit on floor. Bend knees, bring soles of feet together. Hold feet with both hands. Sit tall, lengthen spine. Gently flap knees or let gravity lower them. Hold 3–5 minutes.

| #25 Ardha Matsyendrasana · Half Lord of the Fishes |                                     |          | Intermediate             |
|----------------------------------------------------|-------------------------------------|----------|--------------------------|
| Category                                           | Seated                              | Duration | 30–60 sec each           |
| Breath                                             | Inhale to lengthen; exhale to twist | Caution  | Back injury; disc issues |

#### ◆ BENEFITS

Increases spinal rotation; stimulates digestive fire; energises spine; opens shoulders and chest; detoxifies organs; improves kidney function

#### ■ HOW TO PRACTICE

Sit with legs extended. Bend right knee, cross right foot over left leg, right foot flat. Bend left knee, heel near right hip. Twist torso right, left elbow outside right knee. Look over right shoulder. Hold, switch.

| #26 Janu Sirsasana · Head-to-Knee Forward Bend |                                    |          | Beginner               |
|------------------------------------------------|------------------------------------|----------|------------------------|
| Category                                       | Seated                             | Duration | 30–60 sec each         |
| Breath                                         | Exhale to fold; inhale to lengthen | Caution  | Knee injury; diarrhoea |

#### ◆ BENEFITS

Stretches spine, shoulders, hamstrings; stimulates liver and kidneys; calms brain; relieves anxiety and fatigue; good for high blood pressure

#### ■ HOW TO PRACTICE

Sit with legs extended. Bend right knee, right sole to inner left thigh. Inhale, extend spine. Exhale, fold toward extended left leg. Hold foot or shin. 5 breaths, switch sides.

| #27 Gomukhasana · Cow Face Pose |                                 |          | Intermediate                 |
|---------------------------------|---------------------------------|----------|------------------------------|
| Category                        | Seated                          | Duration | 30–60 sec each               |
| Breath                          | Breathe into shoulders and hips | Caution  | Knee injury; shoulder injury |

#### ◆ BENEFITS

Deep hip and shoulder opener; stretches thighs and ankles; opens chest; relieves chronic knee and hip pain; strengthens spine

#### ■ HOW TO PRACTICE

Stack right knee over left (knees aligned vertically). Feet to sides. Raise left arm, bend elbow behind head. Right arm behind back, clasp fingers (or use strap). Sit tall. Switch sides.

| #28 Dandasana · Staff Pose |                                    |          | Beginner                      |
|----------------------------|------------------------------------|----------|-------------------------------|
| Category                   | Seated                             | Duration | 1–5 min                       |
| Breath                     | Breathe naturally, maintain length | Caution  | Low back injury (use support) |

#### ◆ BENEFITS

Strengthens back muscles; improves posture; stretches chest and shoulders; tones abdominals; foundation for all seated poses; builds awareness

#### ■ HOW TO PRACTICE

Sit with legs extended forward. Flex feet, press thighs down. Sit up straight, spine perpendicular to floor. Hands on floor beside hips. Shoulders back and down. Hold 1–5 minutes.

| #29 Upavistha Konasana · Wide-Angle Seated Forward Bend |                                            |          |                   | Intermediate |
|---------------------------------------------------------|--------------------------------------------|----------|-------------------|--------------|
| Category                                                | Seated                                     | Duration | 1–3 min           |              |
| Breath                                                  | Exhale to walk forward; inhale to lengthen | Caution  | Lower back injury |              |

#### ◆ BENEFITS

Deep inner thigh stretch; stimulates abdominal organs; strengthens spine; opens groins; calms the brain; good for menstrual discomfort

#### ■ HOW TO PRACTICE

Sit and open legs wide (90–150°). Flex feet, engage quads. Walk hands forward as you hinge from hips. Eventually chest toward floor. Hold 1–3 minutes.

| #30 Virasana · Hero Pose |                                   |          |                             | Beginner |
|--------------------------|-----------------------------------|----------|-----------------------------|----------|
| Category                 | Seated                            | Duration | 5–10 min                    |          |
| Breath                   | Breathe naturally, lengthen spine | Caution  | Heart problems; knee injury |          |

#### ◆ BENEFITS

Stretches thighs and ankles; strengthens arches; improves digestion; relieves leg fatigue; calms mind — excellent for pranayama and meditation

#### ■ HOW TO PRACTICE

Kneel with knees together. Separate feet slightly wider than hips. Lower hips to floor between feet (use block if needed). Sit tall, hands on thighs. Hold 5–10 minutes.

| #31 Navasana · Boat Pose |                                     |          |                              | Intermediate |
|--------------------------|-------------------------------------|----------|------------------------------|--------------|
| Category                 | Seated                              | Duration | 30–60 sec                    |              |
| Breath                   | Breathe evenly — do not hold breath | Caution  | Asthma; diarrhoea; pregnancy |              |

#### ◆ BENEFITS

Strengthens abdomen, hip flexors, spine; stimulates kidneys and thyroid; improves digestion; builds core strength; tones leg muscles

#### ■ HOW TO PRACTICE

Sit with knees bent. Lean back slightly, lift feet off floor, shins parallel. Extend arms forward. For full boat: straighten legs. Hold 30–60 sec. Repeat 3–5 times.

| #32 Tolasana · Scale Pose |                                                  |          |                           | Advanced |
|---------------------------|--------------------------------------------------|----------|---------------------------|----------|
| Category                  | Seated                                           | Duration | 10–20 sec                 |          |
| Breath                    | Inhale to lift; hold breath briefly; exhale t... | Caution  | Wrist injury; knee injury |          |

#### ◆ BENEFITS

Strengthens wrists and arms; tones abdominals; develops upper body strength; builds deep core strength; advanced arm balance

#### ■ HOW TO PRACTICE

Come into Lotus Pose. Place hands beside hips. Inhale and press into hands, lifting entire body off floor. Hold 10–20 sec. Lower with control. Repeat 3 times.

| #33 Supta Virasana · Reclined Hero |                              |          |                                       | Intermediate |
|------------------------------------|------------------------------|----------|---------------------------------------|--------------|
| Category                           | Seated                       | Duration | 1–5 min                               |              |
| Breath                             | Breathe into chest and belly | Caution  | Knee injury; ankle injury; lower back |              |

#### ◆ BENEFITS

Deep quadriceps and hip flexor stretch; opens chest and abdomen; stretches ankles; relieves tired legs; therapeutic for flat feet

#### ■ HOW TO PRACTICE

From Virasana, place hands behind hips. Lower onto forearms, then back. Arms overhead or at sides. Hold 1–5 min. Come out slowly — press up through forearms and hands.

| #34 Marichyasana III · Sage Pose C (Twist) |                                     |          |                               | Intermediate |
|--------------------------------------------|-------------------------------------|----------|-------------------------------|--------------|
| Category                                   | Seated                              | Duration | 30 sec each                   |              |
| Breath                                     | Inhale to lengthen; exhale to twist | Caution  | Spinal disc issues; pregnancy |              |

#### ◆ BENEFITS

Strong spinal rotation; stimulates digestive organs; energises the spine; opens shoulder; reduces fatigue; improves kidney function

#### ■ HOW TO PRACTICE

Sit with legs extended. Bend right knee, right foot flat near right hip. Wrap left arm around right knee. Right arm behind you. Twist deeply right. Hold 5 breaths, switch.

| #35 Kurmasana · Tortoise Pose |                                 |          |                                     | Advanced |
|-------------------------------|---------------------------------|----------|-------------------------------------|----------|
| Category                      | Seated                          | Duration | 1–2 min                             |          |
| Breath                        | Slow, deep, surrendered breaths | Caution  | Slipped disc; extreme hip tightness |          |

#### ◆ BENEFITS

Extreme hamstring and inner groin stretch; calms nervous system; induces introspection; stimulates abdominal organs; therapeutic for insomnia

#### ■ HOW TO PRACTICE

Sit with knees bent wide. Lean forward and slide arms under bent knees to the sides. Extend arms and legs simultaneously, lowering torso and forehead toward floor. Hold 1–2 min.

| #36 Hanumanasana · Splits / Monkey Pose |                                       |          |                           | Advanced |
|-----------------------------------------|---------------------------------------|----------|---------------------------|----------|
| Category                                | Seated                                | Duration | 30–60 sec each side       |          |
| Breath                                  | Breathe steadily to release tightness | Caution  | Hamstring or groin injury |          |

#### ◆ BENEFITS

Ultimate hamstring and hip flexor stretch; opens chest; builds flexibility; improves circulation in legs; strengthens thigh muscles

#### ■ HOW TO PRACTICE

From low lunge, slide front foot forward and back knee back until both legs are straight. Hips square. Hands on floor or blocks. Arms raised for full expression. Hold 30–60 sec each side.

| #37 Bakasana (Prep) · Crow Pose Preparation |                               |          |                             | Beginner |
|---------------------------------------------|-------------------------------|----------|-----------------------------|----------|
| Category                                    | Seated                        | Duration | Hold 5–10 sec               |          |
| Breath                                      | Engage core on exhale to lift | Caution  | Wrist injury; carpal tunnel |          |

#### ◆ BENEFITS

Wrist and shoulder strengthening; introduces arm balance mechanics; builds courage; tones core; excellent preparation for arm balances

#### ■ HOW TO PRACTICE

Squat with feet hip-width. Place hands on floor shoulder-width. Come onto tiptoes, knees to outer upper arms. Shift weight forward, finding balance on hands. Feet stay low or just lift.

| #38 Agnistambhasana · Fire Log / Double Pigeon |                                   |          |                              | Intermediate |
|------------------------------------------------|-----------------------------------|----------|------------------------------|--------------|
| Category                                       | Seated                            | Duration | 2–3 min each                 |              |
| Breath                                         | Exhale to release tension in hips | Caution  | Knee injury; hip replacement |              |

#### ◆ BENEFITS

Intense hip opener; stretches IT band and outer hip; prepares for lotus; relieves sciatica; calms the mind; opens sacral chakra

#### ■ HOW TO PRACTICE

Sit with right shin parallel to front of mat. Stack left shin directly on top of right (shins stacked, feet flexed). Fold forward for intensity. Hold 2–3 min, switch.

| #39 Bharadvajasana · Bharadvaja's Twist |                                      |          |                     | Beginner |
|-----------------------------------------|--------------------------------------|----------|---------------------|----------|
| Category                                | Seated                               | Duration | 30–60 sec each      |          |
| Breath                                  | Inhale lengthen; exhale deepen twist | Caution  | Diarrhoea; headache |          |

#### ◆ BENEFITS

Gentle spinal rotation; massages abdominal organs; relieves lower back tension; stretches spine and shoulders; calming and grounding

#### ■ HOW TO PRACTICE

Sit with legs to right side. Left ankle on right arch. Right hand behind you, left hand on right knee. Inhale to lengthen; exhale to twist right. Hold, switch sides.

| #40 Svastikasana · Auspicious Pose |                                     |          |             | Beginner |
|------------------------------------|-------------------------------------|----------|-------------|----------|
| Category                           | Seated                              | Duration | 5–20 min    |          |
| Breath                             | Natural, slow, meditative breathing | Caution  | Knee injury |          |

#### ◆ BENEFITS

Comfortable cross-legged meditation seat; opens hips; calms nervous system; ideal long-hold meditation pose; traditionally used in pranayama

#### ■ HOW TO PRACTICE

Sit cross-legged. Tuck each foot under the opposite thigh (or shin). Spine erect. Hands in mudra. Equal weight on both sitting bones. Eyes closed. Hold for meditation.

## PART III — PRONE & BACKBEND POSES

| #41 Bhujangasana · Cobra Pose | Beginner                          |          |                                       |
|-------------------------------|-----------------------------------|----------|---------------------------------------|
| Category                      | Prone                             | Duration | 15–30 sec                             |
| Breath                        | Inhale to lift; exhale to release | Caution  | Back injury; carpal tunnel; pregnancy |

### ◆ BENEFITS

Strengthens spine; stretches chest, lungs, shoulders, abdomen; stimulates abdominal organs; opens heart; relieves stress and fatigue; firms buttocks

### ■ HOW TO PRACTICE

Lie prone, legs together. Hands under shoulders. Inhale, press hands, lift chest off floor — elbows slightly bent. Roll shoulders back and down. Pubis on floor. Hold 15–30 sec.

| #42 Salabhasana · Locust Pose | Beginner                                     |          |                        |
|-------------------------------|----------------------------------------------|----------|------------------------|
| Category                      | Prone                                        | Duration | 30–60 sec              |
| Breath                        | Exhale to lift; breathe evenly while holding | Caution  | Back injury; pregnancy |

### ◆ BENEFITS

Strengthens entire back body; tones buttocks and hamstrings; stimulates abdominal organs; improves posture; reduces stress

### ■ HOW TO PRACTICE

Lie prone, arms alongside body. Inhale, simultaneously lift head, arms, chest, and legs off floor. Look forward. Squeeze glutes, reach through legs. Hold 5 breaths.

| #43 Dhanurasana · Bow Pose | Intermediate                                  |          |                              |
|----------------------------|-----------------------------------------------|----------|------------------------------|
| Category                   | Prone                                         | Duration | 20–30 sec                    |
| Breath                     | Inhale to lift; breath creates rocking motion | Caution  | Low blood pressure; migraine |

### ◆ BENEFITS

Opens chest, neck, shoulders; stretches entire front body; strengthens back; stimulates digestive and reproductive organs; relieves stress

### ■ HOW TO PRACTICE

Lie prone. Bend knees toward buttocks. Reach back, hold ankles. Inhale, lift chest and thighs simultaneously — rock on abdomen. Pull ankles to create full bow. Hold 5 breaths.

| #44 Makarasana · Crocodile Pose | Beginner                           |          |                                |
|---------------------------------|------------------------------------|----------|--------------------------------|
| Category                        | Prone                              | Duration | 5–15 min                       |
| Breath                          | Slow, deep breaths into lower back | Caution  | Pregnancy (side-lying instead) |

### ◆ BENEFITS

Complete back relaxation; decompresses spine; calms nervous system; relieves back pain; excellent counter pose for all backbends

### ■ HOW TO PRACTICE

Lie prone. Cross forearms under forehead, rest forehead on them. Legs slightly apart, toes turned out. Complete relaxation. Breathe deeply into the lower back. Hold 5–15 min.

| #45 Sphinx Pose · Salamba Bhujangasana |                              |          |                           | Beginner |
|----------------------------------------|------------------------------|----------|---------------------------|----------|
| Category                               | Prone                        | Duration | 1–5 min                   |          |
| Breath                                 | Breathe into chest and belly | Caution  | Back injury (use caution) |          |

#### ◆ BENEFITS

Gentle backbend for beginners and back pain sufferers; strengthens spine and glutes; stretches chest; stimulates abdominal organs; invigorates

#### ■ HOW TO PRACTICE

Lie prone. Place forearms on floor, elbows directly under shoulders. Press forearms down, lift chest. Keep hips and thighs on floor. Roll shoulders back. Hold 1–5 min.

| #46 Ashtanga Namaskara · Eight-Point Salutation |                       |          |              | Beginner |
|-------------------------------------------------|-----------------------|----------|--------------|----------|
| Category                                        | Prone                 | Duration | Hold 5 sec   |          |
| Breath                                          | Exhale to lower; hold | Caution  | Wrist injury |          |

#### ◆ BENEFITS

Strengthens chest, arms, and legs; prepares for backbends; part of Sun Salutation B; opens chest; builds upper body foundation

#### ■ HOW TO PRACTICE

From plank, lower knees, chest, and chin to floor simultaneously — hips stay lifted. Eight points touch floor: chin, chest, both hands, both knees, both toes. Hold briefly.

| #47 Ustrasana · Camel Pose |                                  |          |                                      | Intermediate |
|----------------------------|----------------------------------|----------|--------------------------------------|--------------|
| Category                   | Prone                            | Duration | 30–60 sec                            |              |
| Breath                     | Inhale to open; exhale carefully | Caution  | High/low blood pressure; neck injury |              |

#### ◆ BENEFITS

Deep chest and front body opener; strengthens back; improves posture; stimulates thyroid and adrenal glands; builds confidence and courage

#### ■ HOW TO PRACTICE

Kneel with knees hip-width. Place hands on lower back. Gently arch back, opening chest to ceiling. Reach hands to heels one at a time. Tuck chin or release head back. Hold 5 breaths.

| #48 Urdhva Dhanurasana · Wheel / Upward Bow Pose |                                    |          |                                      | Intermediate |
|--------------------------------------------------|------------------------------------|----------|--------------------------------------|--------------|
| Category                                         | Prone                              | Duration | 15–30 sec                            |              |
| Breath                                           | Exhale to press up; breathe evenly | Caution  | Back injury; carpal tunnel; glaucoma |              |

#### ◆ BENEFITS

Full body backbend; strengthens arms, wrists, legs, spine; opens chest; stimulates thyroid; energising; builds spine flexibility and arm strength

#### ■ HOW TO PRACTICE

Lie on back. Bend knees, feet flat near hips. Place hands beside head, fingers pointing to feet. Press up into full wheel — arms and legs straight. Hold 5 breaths, 3 rounds.

| #49 Kapotasana · King Pigeon Pose |                         |          |                                   | Advanced |
|-----------------------------------|-------------------------|----------|-----------------------------------|----------|
| Category                          | Prone                   | Duration | 10–20 sec                         |          |
| Breath                            | Slow, controlled breath | Caution  | Any back, neck, or knee condition |          |

#### ◆ BENEFITS

Ultimate back flexibility and chest opener; stimulates nervous system; opens hip flexors; builds upper body strength; advanced backbend

#### ■ HOW TO PRACTICE

Kneel upright. Arch back, lowering hands to floor behind feet. Walk hands toward feet, eventually holding ankles. Crown of head toward feet. Extremely advanced — years of preparation required.

| #50 Setu Bandha Sarvangasana · Bridge Pose |                                  |          |             | Beginner |
|--------------------------------------------|----------------------------------|----------|-------------|----------|
| Category                                   | Prone                            | Duration | 30–60 sec   |          |
| Breath                                     | Exhale to lift; breathe steadily | Caution  | Neck injury |          |

#### ◆ BENEFITS

Stretches chest, neck, spine; calms brain; reduces anxiety and mild depression; strengthens legs and glutes; stimulates thyroid

#### ■ HOW TO PRACTICE

Lie on back, knees bent, feet flat hip-width. Arms alongside body. Exhale, press feet and arms into floor, lift hips toward ceiling. Clasp hands under back. Hold 5 breaths.

| #51 Eka Pada Raj Kapotasana · One-Legged King Pigeon |                            |          |                              | Advanced |
|------------------------------------------------------|----------------------------|----------|------------------------------|----------|
| Category                                             | Prone                      | Duration | 1 min each                   |          |
| Breath                                               | Breathe into the right hip | Caution  | Hip replacement; knee injury |          |

#### ◆ BENEFITS

Intense hip opener; stretches hip flexors, piriformis, groin; relieves sciatica; opens chest; calms the mind; releases emotional tension held in hips

#### ■ HOW TO PRACTICE

From downward dog, bring right knee behind right wrist, right foot toward left hip. Left leg extends straight back. Upright or fold forward. Deep breathing. Hold, switch.

| #52 Rajakapotasana · Full Pigeon Backbend |                           |          |                      | Advanced |
|-------------------------------------------|---------------------------|----------|----------------------|----------|
| Category                                  | Prone                     | Duration | 20–30 sec each       |          |
| Breath                                    | Slow controlled breathing | Caution  | Back/knee/hip injury |          |

#### ◆ BENEFITS

Combines deep hip opening with backbend; builds extreme back flexibility; stimulates entire spine; opens chest; advanced combination pose

#### ■ HOW TO PRACTICE

From pigeon, raise torso upright. Bend back knee, reach back hand to hold foot. Arch back, bringing foot toward head. Both hands hold foot in advanced version.

| #53 Scorpion Pose on Forearms · Vrschikasana on Forearms |                         |          |                                         | Advanced |
|----------------------------------------------------------|-------------------------|----------|-----------------------------------------|----------|
| Category                                                 | Prone                   | Duration | 10–20 sec                               |          |
| Breath                                                   | Slow breath for control | Caution  | Any spinal, shoulder, or neck condition |          |

#### ◆ BENEFITS

Ultimate back flexibility; builds shoulder strength; improves balance; stimulates brain; advanced inversion-backbend combination

#### ■ HOW TO PRACTICE

Begin in forearm balance. Bend knees, arch spine, lower feet toward head. Find balance while arching. Extremely advanced — requires forearm balance mastery first.

| #54 Anjaneyasana · Low Lunge |                                       |          |                     | Beginner |
|------------------------------|---------------------------------------|----------|---------------------|----------|
| Category                     | Prone                                 | Duration | 30–60 sec each side |          |
| Breath                       | Inhale to rise; exhale to sink deeper | Caution  | Knee injury         |          |

#### ◆ BENEFITS

Stretches hip flexors and groin; opens chest; strengthens legs; improves balance; relieves sciatica; opens the heart chakra

#### ■ HOW TO PRACTICE

From downward dog, step right foot between hands. Lower left knee to floor. Raise arms overhead, arch slightly. Sink hips toward floor. Hold 30–60 sec, switch.

| #55 Purvottanasana · Upward Plank / Reverse Plank |                           |          |                                   | Intermediate |
|---------------------------------------------------|---------------------------|----------|-----------------------------------|--------------|
| Category                                          | Prone                     | Duration | 30 sec                            |              |
| Breath                                            | Breathe evenly throughout | Caution  | Wrist injury; rotator cuff issues |              |

#### ◆ BENEFITS

Strengthens wrists, arms, shoulders, back, legs; stretches chest and shoulders; builds full body posterior chain strength; opens heart

#### ■ HOW TO PRACTICE

Sit in Dandasana, hands behind hips. Press into hands, lift hips to full plank (feet flat, toes pointing). Lower or tilt head back. Hold 30 sec.

| #56 Shalabhasana (Full) · Full Locust |                                             |          |                                 | Intermediate |
|---------------------------------------|---------------------------------------------|----------|---------------------------------|--------------|
| Category                              | Prone                                       | Duration | 20–30 sec                       |              |
| Breath                                | Exhale to maximum lift; hold breath briefly | Caution  | Peptic ulcer; hernia; pregnancy |              |

#### ◆ BENEFITS

Strengthens entire spine; tones kidney region; helps disc issues; strengthens buttocks; improves posture; stimulates metabolism

#### ■ HOW TO PRACTICE

Lie prone, arms alongside body. Lift head, arms, chest, and legs simultaneously as high as possible. Body balances on lower abdomen and pelvis. Hold 5 breaths.

| #57 Vyaghrasana · Tiger Pose |                                   |          |                           | Beginner |
|------------------------------|-----------------------------------|----------|---------------------------|----------|
| Category                     | Prone                             | Duration | 30 sec each side          |          |
| Breath                       | Inhale to extend; exhale to round | Caution  | Wrist injury; knee injury |          |

#### ◆ BENEFITS

Stretches spine in both directions (cat-cow); strengthens back muscles; stretches hip flexors; improves spinal flexibility; massages organs

#### ■ HOW TO PRACTICE

On all fours. Inhale: extend right arm forward and left leg back (Superman). Exhale: round spine, bring knee to nose. Repeat 10 times. Switch sides.

| #58 Marjariasana-Bitilasana · Cat-Cow Pose |                                              |          |                  | Beginner |
|--------------------------------------------|----------------------------------------------|----------|------------------|----------|
| Category                                   | Prone                                        | Duration | 10–20 rounds     |          |
| Breath                                     | Exhale to cat; inhale to cow — never reverse | Caution  | None significant |          |

#### ◆ BENEFITS

Improves spinal flexibility; massages abdominal organs; releases back tension; coordinates breath with movement; warms up entire spine

#### ■ HOW TO PRACTICE

On all fours, wrists under shoulders. Inhale: drop belly (cow) — tailbone up, chest forward, gaze up. Exhale: round spine (cat) — tailbone down, chin to chest. Flow slowly.

| #59 Anahatasana · Puppy Pose |                                   |          |                                   | Beginner |
|------------------------------|-----------------------------------|----------|-----------------------------------|----------|
| Category                     | Prone                             | Duration | 1–3 min                           |          |
| Breath                       | Breathe into upper back and chest | Caution  | Knee injury (place padding under) |          |

#### ◆ BENEFITS

Opens chest and thoracic spine; stretches shoulders; releases upper back tension; calming and heart-opening; great for desk workers

#### ■ HOW TO PRACTICE

From all fours, walk hands forward while keeping hips over knees. Lower chest and forehead (or chin) toward floor. Arms extended. Hold 1–3 minutes.

| #60 Bhikasana · Frog Pose |                                       |          |                                | Advanced |
|---------------------------|---------------------------------------|----------|--------------------------------|----------|
| Category                  | Prone                                 | Duration | 1–3 min                        |          |
| Breath                    | Slow breaths, soften into the stretch | Caution  | Knee injury; lower back injury |          |

#### ◆ BENEFITS

Deep quadriceps and hip flexor stretch; opens groins; stretches ankles; stimulates abdominal organs; stretches inner knees

#### ■ HOW TO PRACTICE

Lie prone. Bend both knees, hold tops of feet with hands — fingers forward, rotate hands to press feet toward floor. Keep knees hip-width. Lower forearms if needed. Hold 1–3 min.

## PART IV — SUPINE POSES

| #61 Savasana · Corpse Pose | Beginner                            |          |                                             |
|----------------------------|-------------------------------------|----------|---------------------------------------------|
| Category                   | Supine                              | Duration | 5–20 min                                    |
| Breath                     | Let breath breathe itself naturally | Caution  | Pregnancy (elevate upper body after 1st ... |

### ◆ BENEFITS

Complete physical and mental relaxation; reduces blood pressure; calms nervous system; relieves fatigue and mild depression; integrates practice

### ■ HOW TO PRACTICE

Lie on back, legs extended. Feet fall open naturally. Arms away from body, palms up. Close eyes. Release all muscle effort. Complete stillness for 5–20 min.

| #62 Halasana · Plow Pose | Intermediate                   |          |                                   |
|--------------------------|--------------------------------|----------|-----------------------------------|
| Category                 | Supine                         | Duration | 1–5 min                           |
| Breath                   | Breathe deeply into upper back | Caution  | Neck injury; asthma; menstruation |

### ◆ BENEFITS

Stretches shoulders, spine, hamstrings; calms the brain; reduces stress and fatigue; stimulates thyroid and prostate; helps insomnia

### ■ HOW TO PRACTICE

From shoulder stand, lower legs overhead until toes touch floor. Support back with hands (or release arms to floor). Keep legs straight. Hold 1–5 min, roll out slowly.

| #63 Sarvangasana · Shoulder Stand | Intermediate             |          |                                             |
|-----------------------------------|--------------------------|----------|---------------------------------------------|
| Category                          | Supine                   | Duration | 3–5 min                                     |
| Breath                            | Breathe into upper chest | Caution  | Neck injury; high blood pressure; menstr... |

### ◆ BENEFITS

Queen of asanas: regulates thyroid; improves circulation; calms brain; tones legs and buttocks; relieves varicose veins; reduces fatigue

### ■ HOW TO PRACTICE

Lie on back. Lift legs overhead (plow), support back with hands. Raise legs perpendicular to floor. Weight on shoulders, neck, upper arms — never neck. Hold 3–5 min.

| #64 Pawanmuktasana · Wind-Relieving Pose | Beginner                   |          |                                        |
|------------------------------------------|----------------------------|----------|----------------------------------------|
| Category                                 | Supine                     | Duration | 1–3 min each                           |
| Breath                                   | Exhale to draw knee closer | Caution  | Pregnancy; hernia; high blood pressure |

### ◆ BENEFITS

Releases gas from intestines; relieves lower back pain; massages abdominal organs; improves digestion; gentle hip stretch and back massage

### ■ HOW TO PRACTICE

Lie on back. Bring right knee to chest, clasp hands around shin. Lift head and nose toward knee. Hold 1 min, release. Repeat left knee, then both together.

| #65 Supta Matsyendrasana · Supine Spinal Twist |                              |          |                                     | Beginner |
|------------------------------------------------|------------------------------|----------|-------------------------------------|----------|
| Category                                       | Supine                       | Duration | 1–3 min each                        |          |
| Breath                                         | Exhale to release into twist | Caution  | Hip replacement; severe disc issues |          |

#### ◆ BENEFITS

Releases lower back tension; stretches glutes and IT band; aids digestion; detoxifies organs; perfect release for end of practice

#### ■ HOW TO PRACTICE

Lie on back, knees bent. Drop both knees to right side. Extend arms in T shape. Gaze left. Keep both shoulders flat on floor. Hold 1–3 min, switch sides.

| #66 Ananda Balasana · Happy Baby Pose |                                   |          |                        | Beginner |
|---------------------------------------|-----------------------------------|----------|------------------------|----------|
| Category                              | Supine                            | Duration | 1–3 min                |          |
| Breath                                | Breathe into inner hips and groin | Caution  | Pregnancy; knee injury |          |

#### ◆ BENEFITS

Gently opens hips and inner thighs; releases lower back; calms brain; relieves stress and fatigue; gently stretches spine

#### ■ HOW TO PRACTICE

Lie on back. Bring knees to chest, then open knees wide to armpits. Hold outsides of feet. Flex feet — press knees toward floor. Rock side to side. Hold 1–3 min.

| #67 Viparita Karani · Legs Up the Wall |                                  |          |                                 | Beginner |
|----------------------------------------|----------------------------------|----------|---------------------------------|----------|
| Category                               | Supine                           | Duration | 5–15 min                        |          |
| Breath                                 | Natural, slow, restful breathing | Caution  | Glaucoma; serious back problems |          |

#### ◆ BENEFITS

Relieves tired legs and feet; reduces mild backache; calms mind; lowers anxiety; improves circulation; drains lymph from legs

#### ■ HOW TO PRACTICE

Sit sideways against wall. Swing legs up as you lie back. Hips close to wall. Arms out, palms up. Close eyes. Hold 5–15 min. Come off by bending knees.

| #68 Supta Baddha Konasana · Reclined Butterfly |                                     |          |                      | Beginner |
|------------------------------------------------|-------------------------------------|----------|----------------------|----------|
| Category                                       | Supine                              | Duration | 5–20 min             |          |
| Breath                                         | Breathe into belly and inner thighs | Caution  | Groin or knee injury |          |

#### ◆ BENEFITS

Deep hip and inner thigh release; calms nervous system; reduces anxiety; excellent for women's health and reproductive system; deeply restorative

#### ■ HOW TO PRACTICE

Lie on back. Bring soles of feet together, knees fall to sides. Support knees with props if needed. Arms at sides or on belly. Complete relaxation. Hold 5–20 min.

| #69 Matsyasana · Fish Pose |                    |          |                                    | Beginner |
|----------------------------|--------------------|----------|------------------------------------|----------|
| Category                   | Supine             | Duration | 30 sec – 1 min                     |          |
| Breath                     | Breathe into chest | Caution  | Migraine; serious neck/back injury |          |

#### ◆ BENEFITS

Counter pose for shoulder stand; opens chest and throat; stretches hip flexors; stimulates thyroid; tones belly and neck muscles

#### ■ HOW TO PRACTICE

Lie on back, legs extended. Slide hands under buttocks. Press elbows into floor, arch back, lift chest. Rest crown of head on floor. Hold 30 sec, counter with forward bend.

| #70 Urdhva Prasarita Padasana · Legs Extended Upward | Beginner                        |          |                            |
|------------------------------------------------------|---------------------------------|----------|----------------------------|
| Category                                             | Supine                          | Duration | 30–60 sec                  |
| Breath                                               | Exhale to lower; inhale to hold | Caution  | Pregnancy; low back injury |

#### ◆ BENEFITS

Strengthens abdominals; stretches hamstrings; relieves lower back; improves circulation; tones leg muscles; can reduce varicose veins

#### ■ HOW TO PRACTICE

Lie on back. Extend both legs perpendicular to floor (90°). Flex feet. Press lower back toward floor. Hold 30–60 sec. Slowly lower with control.

| #71 Jathara Parivartanasana · Belly Twist | Beginner                                         |          |                 |
|-------------------------------------------|--------------------------------------------------|----------|-----------------|
| Category                                  | Supine                                           | Duration | 1–2 min each    |
| Breath                                    | Exhale to release into twist; inhale to lengthen | Caution  | Hip replacement |

#### ◆ BENEFITS

Relieves lower back tension; improves digestion; massages abdominal organs; detoxifies; releases spinal tension; deeply calming

#### ■ HOW TO PRACTICE

Lie on back. Draw both knees to chest. Lower both knees to right, arms in T. Keep both knees together. Gaze left. Hold 1–2 min, switch.

| #72 Setu Bandha Sarvangasana (Supported) · Supported Bridge | Beginner                 |          |                                  |
|-------------------------------------------------------------|--------------------------|----------|----------------------------------|
| Category                                                    | Supine                   | Duration | 5–10 min                         |
| Breath                                                      | Natural, restful breaths | Caution  | Neck injury (use folded blanket) |

#### ◆ BENEFITS

Restorative chest and spine opener; calms nervous system; relieves fatigue; gentle opening for thyroid; reduces anxiety

#### ■ HOW TO PRACTICE

From bridge, slide a block under sacrum (medium height). Release weight onto block. Arms beside body. Close eyes. Breathe into chest. Hold 5–10 min with complete ease.

| #73 Supta Padangusthasana · Reclining Hand-to-Big-Toe Pose | Beginner                 |          |                     |
|------------------------------------------------------------|--------------------------|----------|---------------------|
| Category                                                   | Supine                   | Duration | 1–2 min each        |
| Breath                                                     | Exhale to deepen stretch | Caution  | Diarrhoea; headache |

#### ◆ BENEFITS

Stretches hips, thighs, hamstrings, groins, calves; stimulates prostate; relieves backache and sciatica; menstrual discomfort

#### ■ HOW TO PRACTICE

Lie on back. Bend right knee, loop strap around right foot. Extend leg toward ceiling. Keep hips on floor. For variation: take leg out to side or across body. Hold, switch.

| #74 Yoga Nidrasana · Yoga Sleep Pose | Advanced                   |          |                                             |

# PART V — BALANCE & ARM BALANCES

Focus · Strength · Fearlessness

| #76      | Bakasana · Crow Pose             |          | Intermediate                |
|----------|----------------------------------|----------|-----------------------------|
| Category | Balance                          | Duration | 10–30 sec                   |
| Breath   | Exhale to lift; breathe steadily | Caution  | Wrist injury; carpal tunnel |

## ◆ BENEFITS

Strengthens wrists, forearms, abdomen; opens groins and hip flexors; builds focus and courage; tones abdominal organs; gateway arm balance

## ■ HOW TO PRACTICE

Squat, feet hip-width. Place hands on floor shoulder-width. Lean forward, place knees on backs of upper arms. Shift weight forward, lift feet, balance. Hold 10–30 sec.

| #77      | Vasisthasana · Side Plank     |          | Intermediate                  |
|----------|-------------------------------|----------|-------------------------------|
| Category | Balance                       | Duration | 15–30 sec each side           |
| Breath   | Breathe steadily; engage core | Caution  | Wrist injury; shoulder injury |

## ◆ BENEFITS

Strengthens wrists, arms, core, legs; tones entire side body; improves balance; builds shoulder stability

## ■ HOW TO PRACTICE

From plank, shift weight to right hand. Stack left foot on right. Raise left arm to sky. Create diagonal line from head to feet. Hold 15–30 sec, switch sides.

| #78      | Ardha Chandrasana · Half Moon Pose |          | Intermediate                 |
|----------|------------------------------------|----------|------------------------------|
| Category | Balance                            | Duration | 30 sec each                  |
| Breath   | Breathe evenly; gaze soft          | Caution  | Headache; low blood pressure |

## ◆ BENEFITS

Strengthens abdomen, ankles, legs; stretches hamstrings and calves; opens chest and shoulders; improves coordination; relieves stress

## ■ HOW TO PRACTICE

From triangle, bend front knee slightly. Right hand 12 inches forward. Lift left leg parallel to floor. Open hips to left. Extend left arm to sky. Hold, switch.

| #79      | Eka Pada Koundinyasana · One-Legged Sage Pose |          | Advanced                      |
|----------|-----------------------------------------------|----------|-------------------------------|
| Category | Balance                                       | Duration | 10–20 sec each                |
| Breath   | Exhale to shift forward                       | Caution  | Wrist injury; shoulder injury |

## ◆ BENEFITS

Advanced arm balance; strengthens core and arms; opens hip; twists spine; builds extreme body awareness and coordination

## ■ HOW TO PRACTICE

From Plank, bring right knee toward right tricep. Shift weight forward onto hands. Extend right leg to the right, left leg back. Hold 10–20 sec each side.

| #80 Astavakrasana · Eight-Angle Pose |                           |          |                               | Advanced |
|--------------------------------------|---------------------------|----------|-------------------------------|----------|
| Category                             | Balance                   | Duration | 10–20 sec each                |          |
| Breath                               | Exhale to extend and hold | Caution  | Wrist injury; shoulder injury |          |

#### ◆ BENEFITS

Strengthens arms, wrists, core; requires full body coordination; builds arm balance confidence; tones abdominals; improves focus

#### ■ HOW TO PRACTICE

Sit, hook right leg over right shoulder. Thread left leg under. Place hands on floor, shift forward. Extend and cross legs to the right. Lower chest parallel to floor.

| #81 Mayurasana · Peacock Pose |                             |          |                                        | Advanced |
|-------------------------------|-----------------------------|----------|----------------------------------------|----------|
| Category                      | Balance                     | Duration | 10–20 sec                              |          |
| Breath                        | Hold breath briefly at peak | Caution  | Wrist/elbow injury; pregnancy; high BP |          |

#### ◆ BENEFITS

Strengthens wrists and forearms; tones abdominal organs; stimulates digestive system; detoxifies; builds extreme body strength

#### ■ HOW TO PRACTICE

Kneel. Place hands on floor, fingers pointing backward. Place elbows into abdomen. Lean forward over hands. Extend legs behind. Hold 10–20 sec.

| #82 Tittibhasana · Firefly Pose |                                    |          |                                | Advanced |
|---------------------------------|------------------------------------|----------|--------------------------------|----------|
| Category                        | Balance                            | Duration | 10–20 sec                      |          |
| Breath                          | Exhale to extend; breathe steadily | Caution  | Wrist injury; hamstring injury |          |

#### ◆ BENEFITS

Strengthens wrists, arms, core; opens groins; stretches hamstrings; builds confidence in arm balances; tones abdominals

#### ■ HOW TO PRACTICE

Squat with feet shoulder-width. Thread arms under knees, place hands on floor. Extend legs to straighten on upper arms. Shift weight onto hands, lift hips.

| #83 Handstand (Supported) · Adho Mukha Vrksasana |                               |          |                                   | Intermediate |
|--------------------------------------------------|-------------------------------|----------|-----------------------------------|--------------|
| Category                                         | Balance                       | Duration | 10–30 sec                         |              |
| Breath                                           | Breathe steadily; engage core | Caution  | Wrist injury; high blood pressure |              |

#### ◆ BENEFITS

Builds upper body strength; improves balance; increases confidence; stimulates nervous system; strengthens wrists and shoulders

#### ■ HOW TO PRACTICE

Face wall, hands 6 inches from baseboard. Walk feet up wall as hands walk in. Eventually kick one foot up, then both. Core tight. Hold 10–30 sec.

| #84 Pincha Mayurasana · Forearm Stand |                             |          |                                   | Advanced |
|---------------------------------------|-----------------------------|----------|-----------------------------------|----------|
| Category                              | Balance                     | Duration | 10–30 sec                         |          |
| Breath                                | Breathe steadily and evenly | Caution  | Shoulder/neck injury; back injury |          |

#### ◆ BENEFITS

Strengthens shoulders, core, back; stretches chest and neck; improves balance; calms brain; builds upper body strength

#### ■ HOW TO PRACTICE

Forearms on floor, elbows under shoulders. Walk feet in. Kick one leg up, then both. Stack hips over shoulders. Engage core. Hold 10–30 sec.

| #85 Dwi Pada Sirsasana · Both Legs Behind Head |                          |          | Advanced                         |
|------------------------------------------------|--------------------------|----------|----------------------------------|
| Category                                       | Balance                  | Duration | 30–60 sec                        |
| Breath                                         | Slow surrendered breaths | Caution  | Any back, hip, or neck condition |

#### ◆ BENEFITS

Extreme hip flexibility; opens groins; stretches back; calms nervous system; advanced compression pose; deepest hip opener

#### ■ HOW TO PRACTICE

Sit. Place right ankle behind head (as in Yoga Nidrasana). Then left. Bring arms through to floor. Chest forward. Extremely advanced — requires years of preparation.

## PART VII — RESTORATIVE POSES

Healing · Recovery · Parasympathetic

| #91 Balasana · Child's Pose | Beginner                |          |                                   |
|-----------------------------|-------------------------|----------|-----------------------------------|
| Category                    | Restorative             | Duration | 1–10 min                          |
| Breath                      | Breathe into lower back | Caution  | Diarrhoea; pregnancy; knee injury |

### ◆ BENEFITS

Gently stretches hips, thighs, ankles; relieves back pain; calms brain; relieves stress and fatigue; rest pose — use any time during practice

### ■ HOW TO PRACTICE

Kneel, big toes together. Sit back on heels. Fold torso forward over thighs. Extend arms forward (active) or alongside body (passive). Forehead to mat. Breathe.

| #92 Viparita Karani (Supported) · Supported Legs Up Wall | Beginner                  |          |                         |
|----------------------------------------------------------|---------------------------|----------|-------------------------|
| Category                                                 | Restorative               | Duration | 10–20 min               |
| Breath                                                   | Natural restful breathing | Caution  | Glaucoma; hiatal hernia |

### ◆ BENEFITS

Deep nervous system restoration; reverses fatigue; reduces anxiety; improves sleep; drains lymph; reduces swollen legs; immune boosting

### ■ HOW TO PRACTICE

Place folded blanket 6 inches from wall. Sit on blanket, legs up wall. Lie back, shoulders lower than hips. Arms open. Complete surrender. Hold 10–20 min.

| #93 Supta Baddha Konasana (Supported) · Supported Reclined Butterfly | Beginner               |          |                               |
|----------------------------------------------------------------------|------------------------|----------|-------------------------------|
| Category                                                             | Restorative            | Duration | 10–20 min                     |
| Breath                                                               | Natural soft breathing | Caution  | Groin injury (adjust support) |

### ◆ BENEFITS

Deepest hip and groin release; opens chest; completely calms nervous system; profound relaxation; excellent for adrenal recovery

### ■ HOW TO PRACTICE

Place bolster along spine. Lie back on bolster, head on blanket. Bring soles together, support knees with blocks or blankets. Arms open. Eyes closed. 10–20 min.

| #94 Salamba Savasana · Supported Corpse Pose | Beginner                              |          |                              |
|----------------------------------------------|---------------------------------------|----------|------------------------------|
| Category                                     | Restorative                           | Duration | 15–30 min                    |
| Breath                                       | Let breath breathe itself; no control | Caution  | None — suitable for everyone |

### ◆ BENEFITS

Deepest restoration available in yoga; heals adrenal fatigue; integrates all practice; reduces cortisol; profound healing state

### ■ HOW TO PRACTICE

Bolster under knees, blanket under head, eye pillow. Lie completely still. Arms at 45° from body. Sandbag on thighs optional. Complete release for 15–30 min.

| #95 Paschimottanasana (Supported) · Supported Forward Fold |                      |          |                  | Beginner |
|------------------------------------------------------------|----------------------|----------|------------------|----------|
| Category                                                   | Restorative          | Duration | 3–5 min          |          |
| Breath                                                     | Soft natural breaths | Caution  | None significant |          |

#### ◆ BENEFITS

Restorative hamstring and spine release; calms the mind; activates parasympathetic nervous system; relieves mild depression

#### ■ HOW TO PRACTICE

Sit with legs extended. Place bolster or folded blankets across legs. Fold forward and rest torso on support. Head turns to one side. Completely surrender. 3–5 min.

## PART VIII — PRANAYAMA

Breath · Life Force · Transformation

| #96 Ujjayi Pranayama · Victorious / Ocean Breath | Beginner                            |          |                                             |
|--------------------------------------------------|-------------------------------------|----------|---------------------------------------------|
| Category                                         | Pranayama                           | Duration | 5–10 min                                    |
| Breath                                           | Maintain subtle throat constriction | Caution  | Hyperventilation tendency; pregnancy (ge... |

### ◆ BENEFITS

Calms nervous system; warms the body; improves concentration; reduces high blood pressure; used throughout Vinyasa and Ashtanga practice

### ■ HOW TO PRACTICE

Sit comfortably. Slightly constrict back of throat (like fogging a mirror). Breathe through nose, creating ocean sound on both inhale and exhale. Smooth and steady. 5–10 min.

| #97 Kapalabhati · Skull-Shining Breath | Intermediate                        |          |                                         |
|----------------------------------------|-------------------------------------|----------|-----------------------------------------|
| Category                               | Pranayama                           | Duration | 3–5 min                                 |
| Breath                                 | Passive inhale; active sharp exhale | Caution  | Pregnancy; menstruation; high BP; heart |

### ◆ BENEFITS

Detoxifies lungs and blood; strengthens abdominals; clears nasal passages; energises; activates sympathetic nervous system; improves digestion

### ■ HOW TO PRACTICE

Sit comfortably. Inhale naturally. Exhale sharply through nose — belly pumps in (active). Inhalation is passive recoil. Start 30 rounds/min, build to 120/min. 3 rounds × 30.

| #98 Anulom Vilom · Alternate Nostril Breathing | Beginner                                         |          |                            |
|------------------------------------------------|--------------------------------------------------|----------|----------------------------|
| Category                                       | Pranayama                                        | Duration | 5–10 min                   |
| Breath                                         | Ratio: inhale 1, hold 0 (beginner) or 4, exha... | Caution  | Severe respiratory illness |

### ◆ BENEFITS

Balances hemispheres; reduces anxiety; purifies energy channels (nadis); improves respiratory health; calms mind instantly; improves focus

### ■ HOW TO PRACTICE

Right hand Vishnu mudra: thumb closes right nostril, ring finger closes left. Inhale left 4 counts. Close both (hold optional). Open right, exhale 8 counts. Inhale right 4. Exhale left 8. Repeat.

| #99 Bhramari · Bee Breath / Humming Breath | Beginner                                     |          |               |
|--------------------------------------------|----------------------------------------------|----------|---------------|
| Category                                   | Pranayama                                    | Duration | 5–10 min      |
| Breath                                     | Smooth humming exhale; sound quality matters | Caution  | Ear infection |

### ◆ BENEFITS

Immediately calms nervous system; relieves anxiety and anger; reduces BP; enhances concentration; soothes migraines; improves vocal quality

### ■ HOW TO PRACTICE

Sit comfortably. Plug ears with thumbs. Place fingers over face. Inhale fully. Exhale making a continuous humming sound. Feel vibration in skull. 5–10 rounds.

| #100 Nadi Shodhana (Advanced) · Channel Purification Breath |                                                  |          | Advanced                                    |
|-------------------------------------------------------------|--------------------------------------------------|----------|---------------------------------------------|
| Category                                                    | Pranayama                                        | Duration | 10–15 min                                   |
| Breath                                                      | Inhale 4, hold 16 (mula + uddiyana bandha), e... | Caution  | Any heart/BP condition; without teacher ... |

#### ◆ BENEFITS

Deepest pranayama for calming; balances all energy systems; prepares for deep meditation; purifies entire system; most advanced breath retention practice

#### ■ HOW TO PRACTICE

Alternate nostril with full retention ratios. Ratio: 1:4:2 (inhale 4 counts, hold 16, exhale 8). Bandhas (locks) applied during retention. Advanced — build slowly over months.

## Your Yoga Journey Begins Now

Yoga is not a destination but an ever-unfolding journey inward. Every time you step onto the mat, you arrive exactly where you need to be. Trust the process. Trust your body. Practice with patience, and let the transformation come in its own time.

*"Yoga is the art, science and philosophy of life." — Pattabhi Jois*
