

Advanced Bulking Cycle with Peptides

Mass Building Protocol — Anabolics + Peptide Synergy

16 Weeks	5 Compounds	500+ kcal Surplus	52+ pg Pages
--------------------------------	-----------------------------------	---	------------------------------------

■ **MEDICAL DISCLAIMER:** This guide is for educational and harm-reduction purposes only. The compounds discussed are prescription medications in many countries. Always consult a qualified physician before using any pharmacological substance. Tiger Fitness Pro does not encourage illegal activity.

Advanced Bulking Cycle with Peptides

This protocol combines a classic testosterone + deca base with BPC-157 and GHRP-6 peptides to maximise anabolic signalling, accelerate recovery, and protect joints under heavy loading. Suitable for athletes with 2+ prior cycles.

The Stack

Compound	Type	Weeks	Dose	Frequency
Testosterone Enanthate	Anabolic	1–16	500 mg	2x/week (Mon/Thu)
Nandrolone Decanoate	Anabolic	1–14	400 mg	1x/week
Dianabol (kickstart)	Oral anabolic	1–4	30 mg/day	Split 3x daily
BPC-157	Peptide	1–16	250 mcg	2x/day subcut
GHRP-6	GH secretagogue	1–12	100 mcg	3x/day fasted
Anastrozole (AI)	Aromatase inhibitor	1–16	0.5 mg	E3D
HCG	Hormone	1–14	500 IU	2x/week

Peptide Administration Guide

Peptide	Reconstitution	Injection Site	Timing	Storage
BPC-157	2 mL BAC water per 5 mg vial	Subcut abdomen	AM + PM, away from food	Fridge, 4°C
GHRP-6	1 mL BAC water per 5 mg vial	Subcut or IM	Fasted: pre-workout, pre-bed	Fridge after reconstitution
Ipamorelin (alt)	1 mL BAC water	Subcut abdomen	2x/day fasted	Same as GHRP-6

Phase-by-Phase Breakdown

Phase	Weeks	Goal	Key Actions
Kickstart	1–4	Rapid glycogen & strength gain	Dianabol + Test + Deca, high carbs
Foundation	5–10	Steady lean mass accumulation	Test + Deca + Peptides, controlled surplus
Peak Mass	11–14	Maximum hypertrophy	Increase calories 200 kcal, deload wk 14
Transition	15–16	Drop Deca, prep for PCT	Test only, maintain training
PCT	17–20	HPTA restoration	Nolvadex 40/40/20/20 mg

Nutrition — Bulking Phase

Macro	Amount	Notes
Total Calories	TDEE + 400–500 kcal	Lean bulk — minimise fat gain
Protein	2.2 g/kg	Leucine-rich sources preferred
Carbohydrates	5–7 g/kg	Rice, oats, banana, potatoes
Fats	1.2 g/kg	Essential fatty acids, omega-3
Meal frequency	5–6 meals/day	Protein every 3–4 hours
Post-workout meal	Within 30 min	2:1 carb:protein ratio

Training — Strength + Volume Focus

Day	Muscle Group	Rep Scheme	Key Exercise
Mon	Chest + Front Delts	5×5 + 3×12	Flat bench, incline DB
Tue	Back + Rear Delts	4×6 + 3×10	Deadlift, bent-over row
Wed	Legs	5×5 + 3×12	Squat, leg press, RDL
Thu	Shoulders + Traps	4×8	Military press, shrugs
Fri	Arms + Core	3×12–15	BB curl, skull crusher
Sat	Full body or weak point	3×10	Athlete's choice
Sun	Rest	—	Sleep 8+ hrs, BPC-157 injection
